Microsoft Stetlement: Any published programs to date of any plan on how to compensate the millions of people openly ripped off has been a sick joke so far from Microsoft.

Suitable Dream Plan: Recall any and all old Microsoft software disc.
Microsoft to be forced to reimbursst people 75% of the market price that was in place three months after the different programs came on the market. eg. Win 95 sold for \$150.00, so refund would be \$112.50

Please don't forget all of those that did not live or purchase their software in the US. In Canada we paid over \$ 200.00 for that same programe.
